Altitude schema

Oct 24, 2026 · @Danny

Open the Altitude base in Airtable

The base has 4 tables and no linked-record fields. Tables join by plain-text keys (`card_id`, `lounge_id`, `airport_code`). Row counts as of 24 Oct 2026: Cards 9, Perks 13, Lounges 403, LoungebyCard 201.

Status	Meaning
Live	Exists in Airtable and shows in the UI.
Dormant	Exists in Airtable but nothing shows in the UI yet. The code may still read it.
Design	Proposed field or change to meet the new designs (Lounge v1, Compare v2, Opening Directory).

Types follow Airtable's field names. See all available field types in Airtable's field type overview.

Cards (primary: `card_id`)

Open Cards in Airtable

Field	Type	Format & Values	Status
card_id	Single line text	kebab-case slug, e.g. `cimb-travel-world`. Joins to LoungebyCard.	**Live**
card_name	Single line text	Display name, e.g. `CIMB Travel World`, `Maybank Visa Infinite`.	**Live**
		Display name without the bank, e.g. `Travel World`, `Visa Infinite`.	Design Drop the bank name from every value (Excel already done). Design shows short names such as `Infinite` and `Reserve`. Update all 9 Airtable rows together with the UI change that shows `bank` beside it.

Field	Type	Format & Values	Status
bank	Single line text	Issuer name, e.g. `CIMB`, `Maybank`.	Dormant Not read by the UI.
		Issuer name, e.g. CIMB, Maybank. Shown beside the card name.	Design Confirmed in design: the bank is shown on its own line under the card name, e.g. `AURORA` under `Infinite`. Becomes Live once the UI reads it.
tier	Single line text	Card tier label, e.g. `World`, `Platinum`, `Infinite`.	**Live**
net	Single line text	Network label. Currently same text as tier.	**Live**
num	Single line text	Masked card number for visuals. `•••• 0001` on every row.	**Live** Design to-be-removed
		Remove the field. Checked in Lounge v1, Compare v2 and Opening Directory: no page shows a card number.	Design Confirmed in design. Stop rendering it on the card row first, then delete the column.
theme	Single line text	CSS gradient on a single line, e.g. `linear-gradient(135deg,#0e1a16 0%,#163a31 50%,#08110e 100%)`.	**Live** Design to-be-removed

ui_card_background	Single line text	One single-line CSS string, in either variant.
		1. Single colour with a sheen. A dark card with a faint band of colour across the middle. Supply one tint colour, the band strength (about 0.18 to 0.24) and one dark base colour. Use it for cards with a minimum income of RM100,000 and above, because it looks exclusive.
		`linear-gradient(135deg, rgba(R,G,B,0) 0%, rgba(R,G,B,α) 50%, rgba(R,G,B,0) 100%), #BASE`
		2. Two-colour blend. The card fades from one colour to another. Supply a solid start colour and a solid end colour. Use it for cards with a minimum income under RM100,000.
		`linear-gradient(135deg, #START 0%, #END 100%)`
			Design
			No new field. Today's 9 rows use 3 opaque stops, so they fit neither and need rewriting.
			Replaces theme, listed above. Will be named `ui_card_background`. Change Airtable and code together.

fg	Single line text	Hex text colour for the card face, e.g. `#cfe6da`.	**Live** Design to-be-removed
ui_card_text_color	Single line text	Hex text colour for the card face, a pale tint of the card's band colour.	Design Replaces fg, listed above. Will be named ui_card_text_color. Change Airtable and code together.
min_income	Number	• Ringgit per year, e.g. `100000`. • Blank if not researched, or if invitation_only is ticked (see Special handling).	**Live**

Field	Type	Format & Values	Status
invitation_only	Checkbox	• Ticked when the card is by invitation only, e.g. `rhb-premier-visa-infinite`. • Leave `min_income` blank for these cards. The UI shows "By invitation" instead of an income.	Design
annual_fee	Number	Ringgit per year, e.g. `554.72`, `800`. Enter `0` for a card with no annual fee. The UI shows it as complimentary. Blank means not researched. If the fee is only waived on conditions, keep the real amount and put the rule in `annual_fee_details`.	**Live**
annual_fee_details	Long text	Lines split by newline, each starting with `· `, e.g. `· Waived with RM120,000 annual spend`. `NA` when none.	**Live**
lounge_visits	Single line text	Free text, e.g. `3 per quarter, 12 per year`.	**Live**
lounge_access	Single line text	Free text on who can enter and guest terms.	**Live**
lounge_condition	Single line text	Free text spend condition, e.g. `Min. RM3,000 spend per quarter…`.	**Live**
lounge_network	Single line text	Free text, e.g. `150+ selected Plaza Premium Lounges worldwide`.	**Live**
insurance	Single line text	Headline cover, e.g. `Up to RM 2000000 cover`.	**Dormant** Design to-be-removed Not read. The UI shows the five travel_insurance fields instead.
travel_insurance_disruptions	Long text	e.g. `Up to RM25,000 trip cancellation & curtailment`.	**Live**
travel_insurance_medical	Long text	Newline-separated, e.g. `Up to RM25,000` then `Up to RM50,000 per family`.	**Live**
travel_insurance_accident	Long text	e.g. `Up to RM300,000`.	**Live**
travel_insurance_condition	Long text	Activation rule, e.g. `Fare charged to card under MCC 3000 to 3308 …`.	**Live**
travel_insurance_underwriter	Single line text	Insurer name, e.g. `Berjaya Sompo Insurance Berhad`.	**Live**
spending_rewards_cashback	Single line text	Cashback headline, e.g. 5% cashback, all currencies.	Design Line 1 of the Spending rewards row in Compare v2. Replaces `overseas`, listed below.
overseas	Single line text	Overseas-spend reward text.	**Live** Design to-be-removed Not used in any page tab. Replaced by `spending_rewards_cashback`.

Field	Type	Format & Values	Status
spending_rewards_details	Long text	Reward details. Lines split by newline.	Design Line 2 of the Spending rewards row in Compare v2. Replaces `miles`, listed below.
miles	Single line text	e.g. `1.5 miles per RM 1`.	**Live** Design to-be-removed Not used in any page tab. Replaced by `spending_rewards_details`.
transfer	Single line text	e.g. `4 limousine transfers / year`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
fasttrack	Single line text	e.g. `Priority lanes select airports`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
hotel	Single line text	e.g. `Hilton Honors Gold status`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
golf	Single line text	e.g. `12 green fees / year`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
concierge	Single line text	e.g. `24/7 concierge desk`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
roaming	Single line text	e.g. `Unlimited data 100+ countries` or `Unavailable`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
businessclass	Single line text	e.g. `Up to 20% off business class`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
wifi	Single line text	e.g. `RM 200 WiFi credit / year`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.
protection	Single line text	e.g. `90-day purchase protection`.	**Live** Design to-be-removed Not used in any page tab. Replaced by vas_list.

Field	Type	Format & Values	Status
travel_insurance_underwriter_url	URL	https link for the insurer name.	Design Insurer subheader becomes a hyperlink.
vas_list	Long text (JSON)	JSON list, one object per value-added service. Sample in the code block below the table. • Standard: text only. • Icon: an icon name plus text. • Button: text, a button label and a link. • Image: an image link, text and a Learn more link. • Any text can hold a link, written as `[label](url)`.	Design New field, separate from the perk text columns. One JSON list per card for its value-added services. Only Compare v2 shows them.
apply_url	URL	Link for the Apply button, e.g. https://example.com/apply.	Design Compare v2 shows an Apply link.
fx_fee_pct	Single line text	Foreign transaction fee, e.g. 1%.	Design Foreign transaction fee row in Compare v2.
fx_provider	Single select	Network that sets the rate, e.g. Visa, Mastercard. One fixed link per provider in the code.	Design Foreign transaction fee row in Compare v2.
curtail_flight_delay	Single line text	e.g. RM 2,000 after 4 hours.	Design Compare v2 shows delay, cancellation and baggage as separate rows. May replace travel_insurance_disruptions.
curtail_flight_cancellation	Single line text	e.g. Up to RM 50,000.	Design Separate row in Compare v2.
curtail_baggage_delay	Single line text	e.g. RM 2,000 after 6 hours.	Design Separate row in Compare v2.
curtail_condition	Single line text	e.g. Automatic when travel is booked on the card.	Design Activation rule for the curtailment cover.
curtail_underwriter	Single line text	Insurer name, e.g. Chubb Insurance Malaysia Berhad.	Design Insurer line for the curtailment cover.
curtail_underwriter_url	URL	https link for the insurer name.	Design Insurer name becomes a hyperlink.

Perk columns (`overseas` to `protection`) match the `id` values in Perks. Perks ids `lounge` and `insurance` map to the `lounge_*` and `travel_insurance_*` groups. Blank means not yet researched and `Unavailable` means not offered (see Notes). Blank today: every perk on Maybank Visa Infinite.

Special handling (Cards)

Field	Condition	Rule	Example	Status
`min_income`	`invitation_only` is ticked	Must be blank. Never use `0`. The UI shows "By invitation" instead of an income.	`rhb-premier-visa-infinite`	Design

vas_list example (Design)

```
[
  {
    "variant": "standard",
    "text": "Dedicated lifestyle manager"
  },
  {
    "variant": "icon",
    "icon": "golf",
    "text": "Unlimited green fees, worldwide"
  },
  {
    "variant": "button",
    "text": "Complimentary annual travel insurance top-up",
    "label": "Activate benefit",
    "href": "https://example.com"
  },
  {
    "variant": "image",
    "image": "https://example.com/golf.jpg",
    "text": "Access to partner golf resorts",

  }
]
```

Perks (primary: `id`)

Open Perks in Airtable

Field	Type	Format & Values	Status
id	Single line text	**Foreign key** Slug matching a Cards column, e.g. `overseas`, `miles`, `roaming`, `hotel`, `businessclass`.	**Live**
name	Single line text	Display name, e.g. `Overseas Spending Rewards`.	**Live**
pop	Number	Popularity rank, 1 is most popular (13 perks, so 1–13), e.g. `3`, `10`.	**Live**
desc	Single line text	One-line description.	**Live**

Lounges (primary: `lounge_id`)

Open Lounges in Airtable

Field	Type	Format & Values	Status
lounge_id	Single line text	Slug `<airport>-<name>-<terminal>`, e.g. `sin-blossoml-idt1`.	**Live**
region	Single line text	Lowercase region: • `apac` • `mideast` • `europe` • `americas` • `africa`	**Live**
country	Single line text	e.g. `Singapore`.	**Live**
city	Single line text	e.g. `Mandalay`.	**Live**
airport	Single line text	Full airport name.	**Live**
airport_code	Single line text	IATA code, e.g. `SIN`.	**Live**

Field	Type	Format & Values	Status
lounge_name	Single line text	May contain a line break, e.g. `BLOSSOM - SATS & Plaza Premium` then `Lounge`.	**Live**
location	Single line text	Terminal and zone, e.g. `International Departures, Terminal 1`.	**Live**
lat	Number	Decimal degrees, 4 dp.	**Live**
lon	Number	Decimal degrees, 4 dp.	**Live**
term	Single line text	Terminal. Empty on all 403 rows.	Design to-be-removed Not read by the code. Terminal info lives in `location`.
terminal	Single line text	Terminal, e.g. `Terminal 1`. Replaces `term`. Fill it for every lounge.	Design Lounge v1 shows the terminal in the lounge tag, e.g. KUL · Terminal 1.
net	Single line text	Network label. Empty on all 403 rows.	Design to-be-removed The lounge card reads it, but nothing shows while it is empty.
amen	Long text	Amenities, split on a pipe character by the code. Empty on all 403 rows.	Design to-be-removed The lounge card reads it, but nothing shows while it is empty.
opening_hours	Single line text	Opening hours, e.g. Open 24 hours.	Design Lounge v1 shows opening hours on the lounge card.

LoungebyCard (primary: `card_id`)

Open LoungebyCard in Airtable

Field	Type	Format & Values	Status
card_id	Single line text	**Foreign key** Card slug. Repeats across rows, so it is not unique	**Live**
lounge_id	Single line text	**Foreign key** Lounge slug	**Live**
airport_code	Single line text	IATA code. Copy of the lounge's airport code.	Design to-be-removed Not read by the code.
entitlement	Single select	`Meal`, `3 Hours`, `2 Hours`.	**Live**

Notes and decisions

Open the Altitude base in Airtable · GitHub repo

Airtable matches the repo after the 12 Aug field rename. The only gaps for the new designs are the Design rows in the Cards table and the data issues below.

VAS cell JSON (Design)

Proposed JSON for the new `vas_list` field: one list per card, one object per value-added service, in display order. The icon name must be one of the design system's 13 icons. A missing button or Learn more link falls back to `#`.

Decisions for you

1. Rewrite the 9 `theme` values into the sheen or two-colour blend format. No selected-card fields are needed.
2. Approve the Design rows in the Cards table before I change Airtable.
3. Fill LoungebyCard for the other 7 cards before Lounge v1 ships.
4. Confirm `Unavailable` stays the not-offered value and the UI shows it as greyed "Not offered".
